

Information

The Multilevel ISP funeral trolley is a compact and lightweight unit that offers excellent manoeuvrability throughout the removal process. Its multi-height facility allows easy sideways body transfers. An interchangeable removable First Call Stretcher makes removals in space restrictive areas easier. The Multilevel ISP also benefits from our roll in roll out system allowing it to fit into very small nursing home lifts in an upended position without the operator having to take the weight. (Picture with optional MD wheels).

Specifications
