

Information

Auden have designed the new compact Coffin Lifter as a flexible coffin handling solution. The Coffin Lifter reduces the times you need to transfer a coffin and removes the heavy lifting, what's great about this new model is the smaller footprint which increases the flexibility. The Coffin Lifter can be helpful away from your premises as it may be transported under the hearse deck for use as and when needed. The Coffin Lifter is battery powered and mains chargeable and is controlled from the main battery or from a mounted hand controller. The Coffin Lifter can also be fitted with a velvet cover and used in the traditional way in your Chapel of Rest. It our most flexible Coffin Lifter yet.
