

Information

The Multilevel ISP Pro is a newly designed flexible system that can be used to transport our first call and stair stretchers of different sizes. Its new lightweight highly manoeuvrable design has striking looks and new features. The stretcher seat system has folding blocks that allow for a number of options.

The new design can be used every day as a two part trolley and stretcher system and has our roll in roll out feature allowing it to be used upright in a lift or in tight spaces.
